SAFETY DATA SHEET
507/P101 2 PACK POLYURETHANE TOPCOAT CLEAR - BASE

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Product name 507/P101 2 PACK POLYURETHANE TOPCOAT CLEAR - BASE
Product number 507/P101/1 - CLEAR BASE

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses HARDENER FOR TWO COMPONENT CLEAR VARNISH

1.3. Details of the supplier of the safety data sheet

Supplier TEAL & MACKRILL LIMITED
LOCKWOOD STREET
HULL
HU2 0HN

+44(0)1482 320194(T)
+44(0)1482 219266(F)
info@teamac.co.uk

Contact person Technical Department -, 08.30 - 16.30 hrs Mon - Thurs, 08.30 - 15.00 hrs Fri, as above

1.4. Emergency telephone number

Emergency telephone +44 (0) 1482 320194 Teamac (08.30 - 16.30 hrs Mon - Thurs, 08.30 - 15.00 hrs Fri)
SDS No. 10867

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

Classification (EC 1272/2008)
Physical hazards Flam. Liq. 3 - H226
Health hazards STOT SE 3 - H336
Environmental hazards Aquatic Chronic 3 - H412

2.2. Label elements

Hazard pictograms

Signal word Warning
### Hazard statements

EUH208 Contains 1-(Dimethylaminoethyl)-4-methylpiperazine. May produce an allergic reaction.

H226 Flammable liquid and vapour.

H336 May cause drowsiness or dizziness.

H412 Harmful to aquatic life with long lasting effects.

### Precautionary statements

P102 Keep out of reach of children.

P101 If medical advice is needed, have product container or label at hand.

P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking.

P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.

P261 Avoid breathing vapour/ spray.

P273 Avoid release to the environment.

P303+P361+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower.

P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P501 Dispose of contents/ container in accordance with national regulations.

### Supplemental label information

EUH066 Repeated exposure may cause skin dryness or cracking.

Contains 2-METHOXY-1-METHYLETHYL ACETATE, HYDROCARBONS, C9, AROMATICS

### Supplementary precautionary statements

P370+P378 In case of fire: Use foam, carbon dioxide, dry powder or water fog to extinguish.

P403+P235 Store in a well-ventilated place. Keep cool.

### 2.3. Other hazards

This product does not contain any substances classified as PBT or vPvB.

### SECTION 3: Composition/information on ingredients

#### 3.2. Mixtures

Aquatic Chronic 2 - H411  
Classification (67/548/EEC or 1999/45/EC)  
SECTION 4: First aid measures

4.1. Description of first aid measures

General information
Get medical attention immediately. Show this Safety Data Sheet to the medical personnel.

Inhalation
Remove affected person from source of contamination. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt. When breathing is difficult, properly trained personnel may assist affected person by administering oxygen. Place unconscious person on their side in the recovery position and ensure breathing can take place.

Ingestion
Rinse mouth thoroughly with water. Give plenty of water to drink. Give milk instead of water if readily available. Keep affected person under observation. Do not induce vomiting. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention immediately. Show this Safety Data Sheet to the medical personnel.

Skin contact
Remove affected person from source of contamination. Remove contaminated clothing immediately and wash skin with soap and water. Get medical attention if irritation persists after washing.

Eye contact
Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 10 minutes.

Protection of first aiders
First aid personnel should wear appropriate protective equipment during any rescue.

4.2. Most important symptoms and effects, both acute and delayed

General information
See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.

Inhalation
A single exposure may cause the following adverse effects: Dryness of mouth and throat. Coughing, chest tightness, feeling of chest pressure. Overexposure to organic solvents may depress the central nervous system, causing dizziness and intoxication and, at very high concentrations, unconsciousness and death. Congestion of the lungs may occur, producing severe shortness of breath. During application and drying, solvent vapours will be emitted. Vapours in high concentrations are narcotic.
507/P101 2 PACK POLYURETHANE TOPCOAT CLEAR - BASE

Ingestion
A single exposure may cause the following adverse effects: Irritation. Nausea, vomiting. Symptoms following overexposure may include the following: Unconsciousness. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation.

Skin contact
A single exposure may cause the following adverse effects: Redness. Irritation. Discoloration of the skin.

Eye contact
A single exposure may cause the following adverse effects: Redness. Irritation.

4.3. Indication of any immediate medical attention and special treatment needed
Notes for the doctor Treat symptomatically.

SECTION 5: Firefighting measures

5.1. Extinguishing media
Suitable extinguishing media The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.

Unsuitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture
Specific hazards Toxic gases or vapours.

5.3. Advice for firefighters
Protective actions during firefighting Risk of re-ignition after fire has been extinguished. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. Avoid the spillage or runoff entering drains, sewers or watercourses.

Special protective equipment for firefighters Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures
Personal precautions Exclude non-essential personnel. Avoid inhalation of vapours and contact with skin and eyes. Provide adequate ventilation. No smoking, sparks, flames or other sources of ignition near spillage. Ensure suitable respiratory protection is worn during removal of spillages in confined areas.

6.2. Environmental precautions
Environmental precautions Avoid the spillage or runoff entering drains, sewers or watercourses. Contain spillage with sand, earth or other suitable non-combustible material. Spillages or uncontrolled discharges into watercourses must be reported immediately to the Environmental Agency or other appropriate regulatory body.

6.3. Methods and material for containment and cleaning up
Methods for cleaning up Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Small Spillages: Collect spillage. Large Spillages: Absorb spillage with non-combustible, absorbent material. The contaminated absorbent may pose the same hazard as the spilled material. Collect and place in suitable waste disposal containers and seal securely. Label the containers containing waste and contaminated materials and remove from the area as soon as possible. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. For waste disposal, see Section 13.
6.4. Reference to other sections

Reference to other sections

For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Usage precautions

Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Handle all packages and containers carefully to minimise spills. Keep container tightly sealed when not in use. Avoid the formation of mists. Do not handle until all safety precautions have been read and understood. Do not handle broken packages without protective equipment.

Advice on general occupational hygiene

Wash promptly if skin becomes contaminated. Take off contaminated clothing. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.

7.2. Conditions for safe storage, including any incompatibilities

Storage precautions

Store in closed original container at temperatures between 5°C and 25°C. Keep away from heat, sparks and open flame. Keep container tightly closed. Keep containers upright. Keep locked up. Store in tightly-closed, original container in a well-ventilated place. Acids. Store away from the following materials: Store away from the following materials: Oxidising materials. Alkalis. Acids.

Storage class

Unspecified storage.

7.3. Specific end use(s)

Specific end use(s)

The identified uses for this product are detailed in Section 1.2.

Usage description

Collect and place in suitable waste disposal containers and seal securely. Label the containers containing waste and contaminated materials and remove from the area as soon as possible.

SECTION 8: Exposure controls/Personal protection

8.1. Control parameters

Occupational exposure limits

2-METHOXY-1-METHYLETHYL ACETATE

Long-term exposure limit (8-hour TWA): WEL 50 ppm 274 mg/m³
Short-term exposure limit (15-minute): WEL 100 ppm 548 mg/m³
Sk

HYDROCARBONS, C9, AROMATICS

Long-term exposure limit (8-hour TWA): WEL 19 ppm 100 mg/m³ vapour
WEL = Workplace Exposure Limit
Sk = Can be absorbed through the skin.

2-METHOXY-1-METHYLETHYL ACETATE (CAS: 108-65-6)

DNEL

Workers - Inhalation; Long term systemic effects: 275 mg/m³
Workers - Dermal; Long term systemic effects: 796 mg/kg/day
Consumer - Inhalation; Long term systemic effects: 33 mg/m³
Consumer - Dermal; Long term systemic effects: 320 mg/kg/day
Consumer - Oral; Long term systemic effects: 36 mg/kg/day
507/P101 2 PACK POLYURETHANE TOPCOAT CLEAR - BASE

PNEC
- Fresh water; 0.635 mg/l
- STP; 100 mg/l
- Sediment (Marinewater); 0.329 mg/kg
- marine water; 0.0635 mg/l
- Soil; 0.29 mg/kg
- Intermittent release; 6.35 mg/l
- Sediment; 3.29 mg/kg

DNEL
Consumer - Oral; Long term systemic effects: 11 mg/kg/day
Consumer - Dermal; Long term systemic effects: 11 mg/kg/day
Consumer - Inhalation; Long term systemic effects: 32 mg/m³
Industry - Dermal; Long term systemic effects: 25 mg/kg/day
Industry - Inhalation; Long term systemic effects: 150 mg/m³

PNEC
No PNEC available. Substance is a hydrocarbon UVCB. Standard tests for this endpoint are intended for single substances and are not appropriate for the risk assessment of this complex substance.

bis(2-DIMETHYLAMINOETHYL)(METHYL)AMINE (CAS: 3030-47-5)

DNEL
Workers - Dermal; Long term systemic effects: 0.15 mg/m³
Workers - Inhalation; Long term systemic effects: 0.529 mg/m³

PNEC
- Soil; 0.0472 mg/kg
- Intermittent release; 0.549 mg/l
- STP; 100 mg/l
- Fresh water; 0.0549 mg/l
- marine water; 0.00549 mg/l
- Sediment (Freshwater); 0.0398 mg/kg
- Sediment (Marinewater); 0.0398 mg/kg

8.2. Exposure controls

Protective equipment

Appropriate engineering controls
Provide adequate ventilation. Personal, workplace environment or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Use process enclosures, local exhaust ventilation or other engineering controls as the primary means to minimise worker exposure. Personal protective equipment should only be used if worker exposure cannot be controlled adequately by the engineering control measures. Ensure control measures are regularly inspected and maintained. Ensure operatives are trained to minimise exposure.

Eye/face protection
Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with European Standard EN166. Unless the assessment indicates a higher degree of protection is required, the following protection should be worn: Tight-fitting safety glasses.
507/P101 2 PACK POLYURETHANE TOPCOAT CLEAR - BASE

Hand protection
To protect hands from chemicals, gloves should comply with European Standards EN388 and 374. As a general principle, exposure should be managed by means other than the provision of protective gloves. Manufacturer’s performance data suggest that the optimum glove for use should be: Wear protective gloves made of the following material: Polyvinyl alcohol (PVA). Thickness: 0.2 - 0.3 mm Permeation breakthrough time according to EN374 - class: (1-6) e.g. minimum 480 mins. Caution: The performance of gloves under actual working conditions can be significantly affected by many factors and the information provided according to EN374 may not accord with what is achieved in practice. We recommend that expert professional advice is sought that takes into account of the work processes and working environment applicable for each task where gloves are to be worn.

Other skin and body protection
Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible.

Hygiene measures
Provide eyewash station and safety shower. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment and the work area every day. Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke. Preventive industrial medical examinations should be carried out. Warn cleaning personnel of any hazardous properties of the product.

Respiratory protection
Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Ensure all respiratory protective equipment is suitable for its intended use and is ‘CE’-marked. Check that the respirator fits tightly and the filter is changed regularly. Gas and combination filter cartridges should comply with European Standard EN14387. Full face mask respirators with replaceable filter cartridges should comply with European Standard EN136. Half mask and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN140.

Environmental exposure controls
Keep container tightly sealed when not in use.

SECTION 9: Physical and chemical properties

Not determined.

Auto-ignition temperature
314 °C (Methoxy Propanol Acetate)

Decomposition Temperature
Not determined.

Viscosity
2.1 (Cone and Plate) P @ 25°C Kinematic viscosity > 20.5 mm²/s.

Explosive properties
Not determined.

Explosive under the influence of a flame
Not considered to be explosive.

Oxidising properties
Not determined.

9.2. Other information

SECTION 10: Stability and reactivity

10.1. Reactivity
Reactivity
See the other subsections of this section for further details.

10.2. Chemical stability
Stability
Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.

10.3. Possibility of hazardous reactions
Possibility of hazardous reactions
No potentially hazardous reactions known.

10.4. Conditions to avoid
Conditions to avoid
Avoid heat, flames and other sources of ignition. Avoid contact with the following materials: Acids. Oxidising agents. Avoid exposure to high temperatures or direct sunlight.

10.5. Incompatible materials
Materials to avoid
Oxidising agents. Acids - oxidising.

10.6. Hazardous decomposition products
Hazardous decomposition products
Does not decompose when used and stored as recommended. Oxides of carbon. Thermal decomposition or combustion may liberate carbon oxides and other toxic gases or vapours.

SECTION 11: Toxicological information

11.1. Information on toxicological effects
Acute toxicity - dermal
ATE dermal (mg/kg) 265,894.04

Acute toxicity - inhalation
ATE inhalation (vapours mg/l) 5,430.46

General information
The severity of the symptoms described will vary dependent on the concentration and the length of exposure.

Inhalation
Irritating to respiratory system. Vapours in high concentrations are narcotic. Symptoms following overexposure may include the following: Headache. Fatigue. Dizziness. Nausea, vomiting. Central nervous system depression.
507/P101 2 PACK POLYURETHANE TOPCOAT CLEAR - BASE

Ingestion
Irritating. Symptoms following overexposure may include the following: Dizziness, Nausea, vomiting.

Skin contact
Irritating to skin. Harmful: possible risk of irreversible effects in contact with skin.

Eye contact
Irritating to eyes.

Acute and chronic health hazards
Prolonged exposure to the preparation may cause serious health effects. Prolonged and repeated contact with solvents over a long period may lead to permanent health problems. Prolonged or repeated exposure to vapours in high concentrations may cause the following adverse effects: Nausea, vomiting. Headache.

Route of exposure
Inhalation Skin absorption. Ingestion. Skin and/or eye contact.

Target organs
No specific target organs known.

Medical symptoms
Severe irritation, burning and tearing. Central nervous system depression. Drowsiness, dizziness, disorientation, vertigo.

Medical considerations
Skin disorders and allergies.

Toxicological information on ingredients.

**2-METHOXY-1-METHYLETHYL ACETATE**

**Acute toxicity - oral**

| Acute toxicity oral (LD₅₀ mg/kg) | 8,532.0 |
| Species | Rat |
| ATE oral (mg/kg) | 8,532.0 |

**Acute toxicity - dermal**

| Acute toxicity dermal (LD₅₀ mg/kg) | 5,000.0 |
| Species | Rabbit |
| ATE dermal (mg/kg) | 5,000.0 |

**Acute toxicity - inhalation**

| Acute toxicity inhalation (LC₅₀ vapours mg/l) | 35.7 |
| Species | Rat |
| ATE inhalation (vapours mg/l) | 35.7 |

**Skin corrosion/irritation**

| Animal data | Not irritating. |

**Skin sensitisation**

| Skin sensitisation | Based on available data the classification criteria are not met. |

**Germ cell mutagenicity**

| Genotoxicity - in vitro | This substance has no evidence of mutagenic properties. |

**Specific target organ toxicity - single exposure**

| STOT - single exposure | Emits vapours if heated. Vapours/aerosol spray may irritate the respiratory system. |
507/P101 2 PACK POLYURETHANE TOPCOAT CLEAR - BASE

Specific target organ toxicity - repeated exposure
STOT - repeated exposure  Emits vapours, especially if heated.

### HYDROCARBONS, C9, AROMATICS

#### Acute toxicity - oral
- **Acute toxicity oral (LD₅₀ mg/kg)**: 3,492.0

  **Species**  Rat

  **Notes (oral LD₅₀)**  Based on available data the classification criteria are not met.

  **ATE oral (mg/kg)**: 3,492.0

#### Acute toxicity - dermal
- **Acute toxicity dermal (LD₅₀ mg/kg)**: 3,160.0

  **Species**  Rabbit

  **Notes (dermal LD₅₀)**  Based on available data the classification criteria are not met.

  **ATE dermal (mg/kg)**: 3,160.0

#### Acute toxicity - inhalation
- **Acute toxicity inhalation (LC₅₀ vapours mg/l)**: 6,193.0

  **Species**  Rat

  **Notes (inhalation LC₅₀)**  Based on available data the classification criteria are not met.

  **ATE inhalation (vapours mg/l)**: 6,193.0

Skin corrosion/irritation
- Animal data  Repeated exposure may cause skin dryness or cracking.

Serious eye damage/irritation
- Based on available data the classification criteria are not met.

Respiratory sensitisation
- Based on available data the classification criteria are not met.

Skin sensitisation
- Based on available data the classification criteria are not met.

Germ cell mutagenicity
- Based on available data the classification criteria are not met.

Genotoxicity - in vitro
- Based on available data the classification criteria are not met.

Carcinogenicity
- Based on available data the classification criteria are not met.

IARC carcinogenicity
- None of the ingredients are listed or exempt.

Reproductive toxicity
Reproductive toxicity -
fertility
Based on available data the classification criteria are not met.

Reproductive toxicity -
development
Based on available data the classification criteria are not met.

Specific target organ toxicity - single exposure
STOT - single exposure
STOT SE 3 - H335, H336 May cause respiratory irritation. May cause drowsiness or dizziness.

Target organs
Respiratory system, lungs Central nervous system

Specific target organ toxicity - repeated exposure
STOT - repeated exposure
Not classified as a specific target organ toxicant after repeated exposure.

Aspiration hazard
Asp. Tox. 1 - H304 May be fatal if swallowed and enters airways. Pneumonia may be the result if vomited material containing solvents reaches the lungs.

General information
The severity of the symptoms described will vary dependent on the concentration and the length of exposure.

Inhalation
A single exposure may cause the following adverse effects: Irritation of nose, throat and airway. Difficulty in breathing. Coughing. Vapours may cause headache, fatigue, dizziness and nausea. Central nervous system depression. During application and drying, solvent vapours will be emitted. Vapours in high concentrations are narcotic.

Ingestion
Gastrointestinal symptoms, including upset stomach. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation. Aspiration hazard if swallowed. Entry into the lungs following ingestion or vomiting may cause chemical pneumonitis.

Skin contact
Repeated exposure may cause skin dryness or cracking. Discoloration of the skin.

Eye contact
May cause temporary eye irritation.

Route of exposure
Ingestion Inhalation Skin and/or eye contact

Target organs
Central nervous system Respiratory system, lungs

SECTION 12: Ecological Information

Ecotoxicity
The product contains substances which are toxic to aquatic organisms and which may cause long term adverse effects in the aquatic environment.

Ecological information on ingredients.

2-METHOXY-1-METHYLETHYL ACETATE

Ecotoxicity
The product is not expected to be hazardous to the environment.

12.1. Toxicity
Toxicity
Based on available data the classification criteria are not met.

Ecological information on ingredients.

2-METHOXY-1-METHYLETHYL ACETATE
507/P101 2 PACK POLYURETHANE TOPCOAT CLEAR - BASE

**Acute aquatic toxicity**

**Acute toxicity - fish**
- \( LC_{50}, > 96 \text{ hours}: 134 \text{ mg/l}, \) Oncorhynchus mykiss (Rainbow trout)

**12.2. Persistence and degradability**

**Persistence and degradability**
- The product is expected to be biodegradable.

**Ecological information on ingredients.**

**2-METHOXY-1-METHYLETHYL ACETATE**

**Persistence and degradability**
- The product is readily biodegradable.

**Biodegradation**
- Degradation 100% (DOC): 28 days

**HYDROCARBONS, C9, AROMATICS**

**Persistence and degradability**
- The degradability of the product is not known.

**Biodegradation**
- 78%: 28 days

**12.3. Bioaccumulative potential**

**Bioaccumulative potential**
- The product does not contain any substances expected to be bioaccumulating.

**Partition coefficient**
- Not determined.

**Ecological information on ingredients.**

**2-METHOXY-1-METHYLETHYL ACETATE**

**Partition coefficient**
- \( \log K_{ow}: 1.2 \) \( \log P_{ow}: 0.43 \)

**HYDROCARBONS, C9, AROMATICS**

**Bioaccumulative potential**
- No data available on bioaccumulation.

**Partition coefficient**
- Not available.

**12.4. Mobility in soil**
507/P101 2 PACK POLYURETHANE TOPCOAT CLEAR - BASE

Mobility
Mobile. The product contains volatile substances, which may spread in the atmosphere.

Ecological information on ingredients.

HYDROCARBONS, C9, AROMATICS

Mobility
No data available.

12.5. Results of PBT and vPvB assessment
Results of PBT and vPvB assessment
This product does not contain any substances classified as PBT or vPvB.

Ecological information on ingredients.

2-METHOXY-1-METHYLETHYL ACETATE

Results of PBT and vPvB assessment
This substance is not classified as PBT or vPvB according to current EU criteria.

HYDROCARBONS, C9, AROMATICS

Results of PBT and vPvB assessment
This substance is not classified as PBT or vPvB according to current EU criteria.

12.6. Other adverse effects
Other adverse effects
None known.

Ecological information on ingredients.

HYDROCARBONS, C9, AROMATICS

Other adverse effects
None known.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

General information
The generation of waste should be minimised or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements. When handling waste, the safety precautions applying to handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners may retain some product residues and hence be potentially hazardous.

Disposal methods
Waste material and any included combustible absorbent and containers should be suitable for incineration at an approved facility. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority.

Waste class
When this coating, in its liquid state, as supplied, becomes a waste, it is categorised as hazardous waste, with code 08 01 11* (SOLVENT BASED LIQUID WASTE). Part-used containers, not drained and/or rigorously scraped out and containing dried residues of the supplied coating, are categorised as hazardous waste, with code 08 01 11* (SOLVENT BASED LIQUID WASTE). If mixed with other wastes, the above waste code may not be applicable. Used containers, drained and/or rigorously scraped out and containing dry residues of the supplied coating, are categorised as non-hazardous waste, with code 15 01 02 (plastic packaging) or 15 01 04 (metal packaging).
507/P101 2 PACK POLYURETHANE TOPCOAT CLEAR - BASE

General
For limited quantity packaging/limited load information, consult the relevant modal documentation using the data shown in this section.

14.1. UN number
UN No. (ADR/RID) 1263
UN No. (IMDG) 1263
UN No. (ICAO) 1263

Proper shipping name (ADR/RID) PAINT: Contains Hydrocarbons, C9, Aromatics, Class 3, PGIII, (38 °C),(MARINE POLLUTANT)
Proper shipping name (IMDG) PAINT: Contains Hydrocarbons, C9, Aromatics, Class 3, PGIII, (38 °C),(MARINE POLLUTANT)
Proper shipping name (ICAO) PAINT: Contains Hydrocarbons, C9, Aromatics, Class 3, PGIII, (38 °C),(MARINE POLLUTANT)

14.3. Transport hazard class(es)
ADR/RID class 3
IMDG class 3
ICAO class/division 3

Transport labels

14.4. Packing group
ADR/RID packing group III
IMDG packing group III
ICAO packing group III

14.5. Environmental hazards
Environmentally hazardous substance/marine pollutant

14.6. Special precautions for user
Always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

EmS F-E, S-E
Tunnel restriction code (D/E)

14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code
Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

SECTION 15: Regulatory information
507/P101 2 PACK POLYURETHANE TOPCOAT CLEAR - BASE

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

**National regulations**
Control of Substances Hazardous to Health Regulations 2002 (as amended).

**EU legislation**

15.2. Chemical safety assessment
No chemical safety assessment has been carried out.

**Inventories**
**EU - EINECS/ELINCS**
None of the ingredients are listed or exempt.

### SECTION 16: Other information

**Abbreviations and acronyms used in the safety data sheet**
ADR: European Agreement concerning the International Carriage of Dangerous Goods by Road.
ADN: European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways.
RID: European Agreement concerning the International Carriage of Dangerous Goods by Rail.
IATA: International Air Transport Association.
IMDG: International Maritime Dangerous Goods.
CAS: Chemical Abstracts Service.
ATE: Acute Toxicity Estimate.
LC₅₀: Lethal Concentration to 50 % of a test population.
LD₅₀: Lethal Dose to 50% of a test population (Median Lethal Dose).
EC₅₀: 50% of maximal Effective Concentration.
PBT: Persistent, Bioaccumulative and Toxic substance.
vPvB: Very Persistent and Very Bioaccumulative.

**Training advice**
Read and follow manufacturer’s recommendations.

**Revision comments**
Issued in new format for Reach compliance in accordance with EC 1272/2008 Issued in accordance with Annex II to REACH, as amended by Commission Regulation (EU) No. 2015/830 Revisions to Sections (2),(3),(8),(15), and (16) - re-classification of resin components. Revision to sections 2, 8, 11 & 12 for reclassification of solvents.

**Issued by**
Technical Dept. (P.E.)

**Revision date**
19/08/2019

**Revision**
8.1

**Supersedes date**
23/01/2019

**SDS number**
10867

**SDS status**
Approved.
507/P101 2 PACK POLYURETHANE TOPCOAT CLEAR - BASE

**Hazard statements in full**

H226 Flammable liquid and vapour.
H302 Harmful if swallowed.
H304 May be fatal if swallowed and enters airways.
H311 Toxic in contact with skin.
H314 Causes severe skin burns and eye damage.
H317 May cause an allergic skin reaction.
H335 May cause respiratory irritation.
H336 May cause drowsiness or dizziness.
H337 May cause respiratory irritation.
H354 May damage the unborn child.
H411 Toxic to aquatic life with long lasting effects.
H412 Harmful to aquatic life with long lasting effects.
EUH208 Contains 1-(Dimethylaminoethyl)-4-methylpiperazine. May produce an allergic reaction.

**Signature**
