TECHNICAL DATA SHEET
TROPICAL KILLA ANTIFOULING (ALL COLOURS)

DESCRIPTION:
Teamac Tropical Killa Antifouling contains cuprous oxide to give good antifouling performance. Designed for vessels with a max speed of 20 knots. H.S.E Approval No. 8394

RECOMMENDED USE:
Teamac Tropical Killa Antifouling is used as an antifouling for the underwater areas of vessels or underwater structures. Suitable for domestic and commercial vessels with steel, wood, or GRP hulls. Do not use on Aluminium vessels.

AVAILABILITY:
1 litre, 2.5 litre & 5 litre - Red available in 20 litre pack for professional use only.

FINISH:
Semi-gloss

COLOUR:
Red, Black and Blue

TYPICAL S.G. (SPECIFIC GRAVITY):
1.48 to 1.51 @ 20 °C

VOLUME SOLIDS:
49%

WET FILM THICKNESS W.F.T
100 microns

DRY FILM THICKNESS D.F.T
50 microns

EXPECTED SPREADING RATE:
10 sq.m / litre
50 microns dft. Based on brush or roller application

The practical spreading rate may be lower as this depends on factors such as the porosity and roughness of the surface to be painted and material losses during application.

TYPICAL VISCOSITY:
4.5 Poise @ 25 °C

FLASH POINT:
38 °C (closed cup)

DRYING TIME: @ RECOMMENDED D.F.T
Touch dry: 2 hours @ 20 °C
Hard dry: 12 hours @ 20 °C

Full hardness: N/A

Low temperature and high humidity will adversely affect application, drying and performance of any coating.

MINIMUM OVERCOATING TIME:
Minimum 16 hours dependant on film thickness

APPLICATION SPECIAL CONDITIONS:
APPLICATION BY SPRAY IS PERMITTED BUT IS INTENDED TO BE BY PROFESSIONALS.

VOC CONTENT:
402 g / litre
VOC's (Volatile Organic Compounds) contribute to atmospheric pollution

APPLICATION DETAILS:
Application restrictions
Method: Brush or roller Airless spray
Thinner (Max vol): Thinners 17 (5%) Thinners 17 (5%)
Nozzle size: 0.021" - 0.027"
Nozzle pressure: 3600 psi (250 bar)

For further advice contact Teamac Technical Services on +44(0)1482 320194
The physical constants are subject to normal manufacturing tolerances.

Date printed: 31 May 2013
Cleaning solvent: Thinners 17

Recoat interval: Minimum 16 hours dependant on film thickness

SURFACE PREPARATION:
DO NOT USE ON ALUMINIUM VESSELS. Bare Surfaces: On exposed metal and wood, prime first with at least 2 coats of Teamac Metaclor Underwater Primer (but not more than 3). On GRP lightly abrade exposed surfaces and apply 2 coats of Teamac Metaclor Underwater Primer. New steel: Abrasive blast clean to Sa2½ and apply TEAMAC METACLOR UNDERWATER PRIMER. If applying onto shop-primed steel ensure that surface is dry and clean, and areas of damaged primer are suitably cleaned prior to the application of the METACLOR. Maintenance: Remove all loose and damaged existing coating and all marine growth. High pressure wash with fresh water. Areas of breakdown should be blasted or power tool cleaned. Touch up with METACLOR PRIMER to the full existing film thickness. Prior to the application of the full coat ensure that surface is clean and free of all contaminates.

MIXING INSTRUCTIONS:
Mix well before use.

APPLICATION CONDITIONS:
As dictated by normal good painting practice. Care must be taken during application that the temperature is above the dew point to avoid any contamination.

PRECEDING COAT:
Always apply at least Teamac Metaclor Underwater Primer

SUBSEQUENT COAT:
Always apply at least Teamac Tropical Killa Antifouling

REMARKS:
Users must comply fully with all their legal responsibilities under the Control of Pesticides Regulations 1986 (as amended), including complying with all conditions of approval. H.S.E. Approval No 8394. Launch time after painting - minimum 8 hours, maximum 2 to 4 days. A seasonal functional life expectancy of the coating is expected. Minimum 2 coats.

HEALTH AND SAFETY:
See safety data sheet - Red - SDS 10871, other colours - SDS 11000

ISSUED:
31 May 2013

REVISION:
2
